

THREADED ROD M8 - WIPER LINKAGE SYSTEM

Short Description

The threaded rod in stainless steel is the link between the two shafts in our W38L boat windshield wiper system.

Description

A threaded 350 mm rod for the wiper linkage system. By cutting the rod in different lengths you can adjust the center to center distance between the two shafts.

A longer center-to-center distance can be achieved by using [the extension tube 532975](#).

Completes the W38L boat windshield wiper system.

See pdf below for more information.

Variations

Item no	Length (mm)
532970	350 mm
